item**

1. Someone who was likely to be treated, given their covariates, but wasn't:

1 / 1 point

- ☐ will have a small weight
- ☒ will have a large weight

☒ **Correct**

2. Marginal structural models are models of:

1 / 1 point

- ☒ the mean of the potential outcome as a function of possible values of treatment
- ☐ the mean of the observed outcome given observed treatment

☒ **Correct**

3. IPTW estimation works because:

1 / 1 point

- ☐ it does not assume the data are normally distributed
- ☐ it involves removing outliers
- ☒ it creates an unconfounded pseudo-population

☒ **Correct**
